

MONTHLY PERFORMANCE REPORT

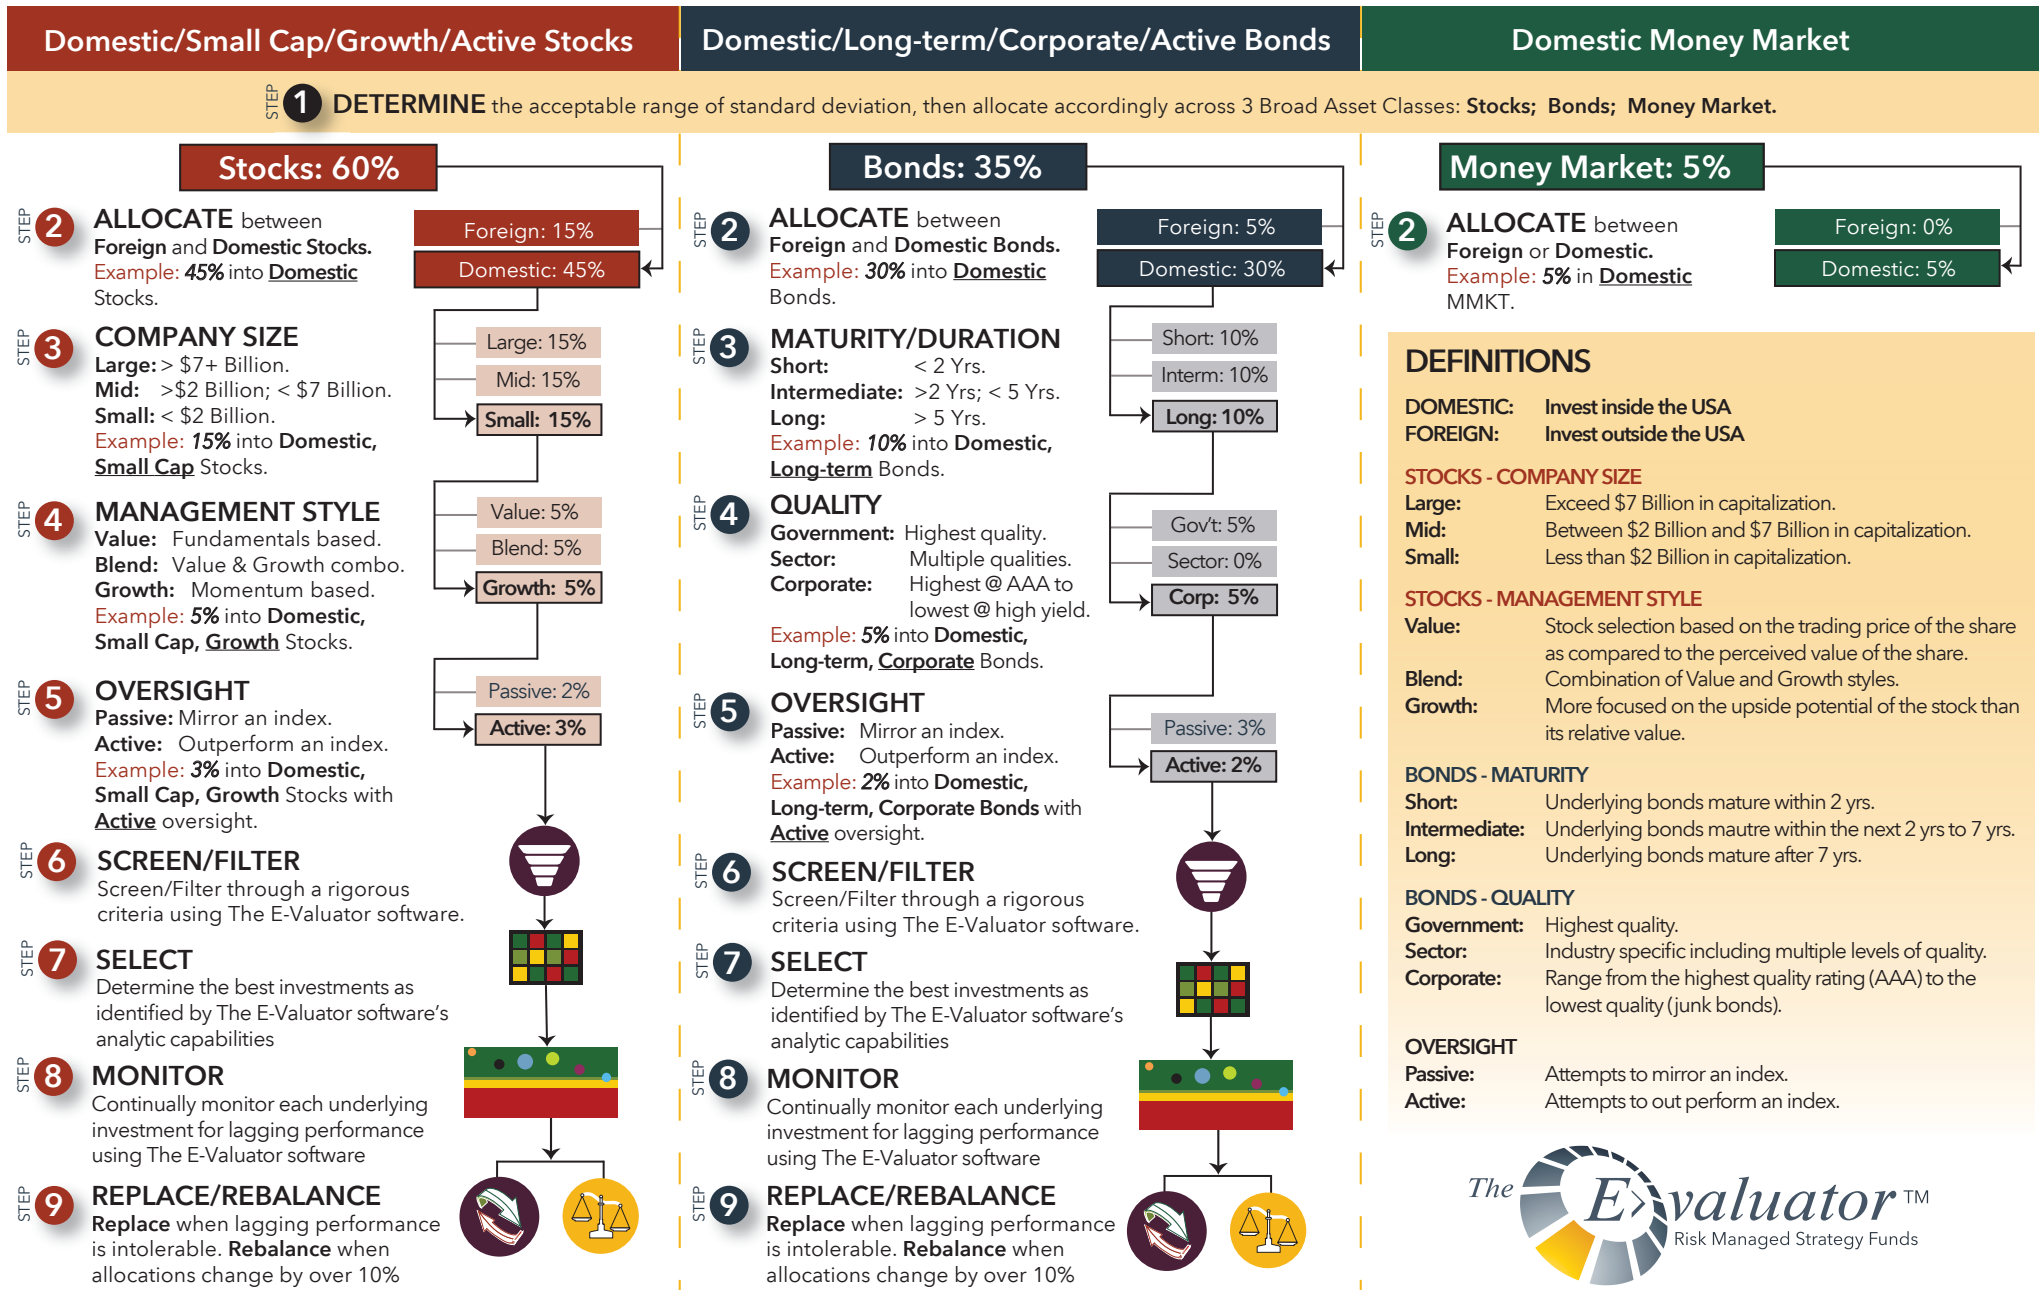

Month Ending: April 30, 2018

Share Class: Service Shares

The Methodology for The E-Valuator Risk Managed Strategy (RMS) Funds

The methodology for selecting the underlying investments held inside each RMS fund involves our Meticulous Asset Allocation Process (M.A.A.P.), which literally provides the "road map" to guide us through the initial selection, and ongoing monitoring of each underlying investment. **MAAP delivers an unbiased, systematic approach to intelligent investing.**

The schematic below illustrates how our MAAP functions by providing the systematic, step-by-step methodology for the allocation percentage of the 3 following investments:

DEFINITIONS

DOMESTIC: Invest inside the USA
FOREIGN: Invest outside the USA

STOCKS - COMPANY SIZE
Large: Exceed \$7 Billion in capitalization.
Mid: Between \$2 Billion and \$7 Billion in capitalization.
Small: Less than \$2 Billion in capitalization.

STOCKS - MANAGEMENT STYLE
Value: Stock selection based on the trading price of the share as compared to the perceived value of the share.
Blend: Combination of Value and Growth styles.
Growth: More focused on the upside potential of the stock than its relative value.

BONDS - MATURITY
Short: Underlying bonds mature within 2 yrs.
Intermediate: Underlying bonds mature within the next 2 yrs to 7 yrs.
Long: Underlying bonds mature after 7 yrs.

BONDS - QUALITY
Government: Highest quality.
Sector: Industry specific including multiple levels of quality.
Corporate: Range from the highest quality rating (AAA) to the lowest quality (junk bonds).

OVERSIGHT
Passive: Attempts to mirror an index.
Active: Attempts to out perform an index.

* Performance history. (1) The quoted performance data of this Fund includes past performance as a collective fund from 2-29-12 through 5-26-16, before the registration statement became effective; (2) This Fund was not registered under the 1940 Act prior to 5-26-16, therefore it was not subject to certain investment restrictions that are imposed by the Act; and (3) if this Fund had been registered under the 1940 Act, the performance history may have been adversely affected. The performance of the collective investment fund has not been restated to reflect the fees, expenses and fee waivers and/or expense limitations applicable to each class of shares of the Fund. If the performance of the collective investment fund had been restated to reflect the applicable fees and expenses of each class of shares of the Fund, the performance may have been lower than the performance shown. Please refer to the Performance History section of the prospectus for more detailed information.

Performance data quoted represents past performance. The Fund's past performance does not guarantee future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. To obtain performance data current to the most recent month end, please call 888-507-2798.

⁽¹⁾ The Adviser has agreed to waive 0.07% of its management fee. The Adviser may not terminate this contractual arrangement prior to January 31, 2019 except pursuant to mutual consent between the Fund and the Adviser or in the event that the investment advisory agreement is terminated. Without this waiver, expenses would be higher and performance would be lower.

** Performance-based Average Difference does **NOT** include the Very Conservative RMS fund data due to the fact the primary focus of the Very Conservative RMS is to protect principal with income generation a secondary consideration. The primary focus of the other RMS investments includes either income, growth, or both.

RISK: There are risks involved with investing, including loss of principal. Current and future portfolio holdings are subject to risks as well. Diversification may not protect against market risk. There is no assurance the goals of the strategies discussed will be met. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from difference in generally accepted accounting in principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Bonds and bond funds will decrease in value as interest rates rise. These and other risks are described more fully in the fund's prospectus. **CREDIT RISK:** The issuer of a fixed income security may not be able to make interest and principal payments when due. Generally, the lower the credit rating of a security, the greater the risk that the issuer will default on its obligation.

The prospectus should be read carefully before investing. An investor should consider the investment objectives, risks, charges and expenses of the investment company before investing. To obtain a prospectus which contains this and other information, contact your financial advisor, call 888-507-2798, or visit our website at www.evaluatorfunds.com.

-----------------------	------------------	--------------	------------	-----------------------	------------------------

Kevin R. Miller,
CEO Systelligence, Portfolio Manager
The E-Valuator Risk Managed Strategy Funds

Monthly Commentary

Month ending April 30, 2018

Fixed Income Assets:

The Federal Reserve continues to raise interest rates, thereby making it very difficult to generate positive results in the Fixed Income markets. The majority of Fixed Income categories posted losses this month with only Ultra Short-Term Bonds, Bank Loan Bonds, High Yield Bonds, and Nontraditional Bonds being the only categories posting positive results. The E-Valuator RMS Funds incorporate all 4 of these categories into their respective asset allocations. Long-term Government Bonds (-2.02%) and Long-term Corporate Bonds (-1.46%) were the two poorest performing categories this month. The leading Fixed Income categories this month were:

- High Yield Bonds: +0.47%
- Bank Loan Bonds: +0.40%
- Ultra Short-term Bonds: +0.18%

Equity Assets:

Domestic Equity investments posted positive results for the most part this month with only Mid-Cap Blend and Mid-Cap Growth posting losses. Likewise, Foreign Equity had a good month with only Foreign Small/Mid Growth and Emerging Markets posting losses. In general, Foreign Equities outperformed Domestic Equities. Value style management outperformed Growth style management in both domestic and foreign markets. The overall positive results were supported by a healthy corporate earnings reports, and being able to fight off concerns over inflation and increased tariffs. The best performing Equity Asset Categories this month were:

- Foreign, Large-Cap Value Stocks: +1.96%
- Foreign, Small/Mid Value Stocks: +1.32%
- Foreign, Large-Cap Blend Stocks: +1.23%

Based on category data provided by Morningstar, Inc.

DEFINITIONS:

Expense Ratio:

The expense ratio is the percentage of fund assets paid for operating expenses and management fees. Fund expenses are subtracted from the fund's assets on a daily basis.

Standard Deviation:

Standard deviation is the statistical measurement of dispersion above, or below, an average which depicts how widely an investment's returns varied over a certain period of time. Investors use the standard deviation of historical performance to try to predict the range of returns that is most likely for a given investment. When an investment has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

Sharpe Ratio:

The Sharpe Ratio is a risk-adjusted measure developed by Nobel Laureate William Sharpe.

It is calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe Ratio, the better the portfolio's historical risk-adjusted performance.
